

Steel wire with a clip for trapezoidal sheet metal, with a STL8x20 universal device

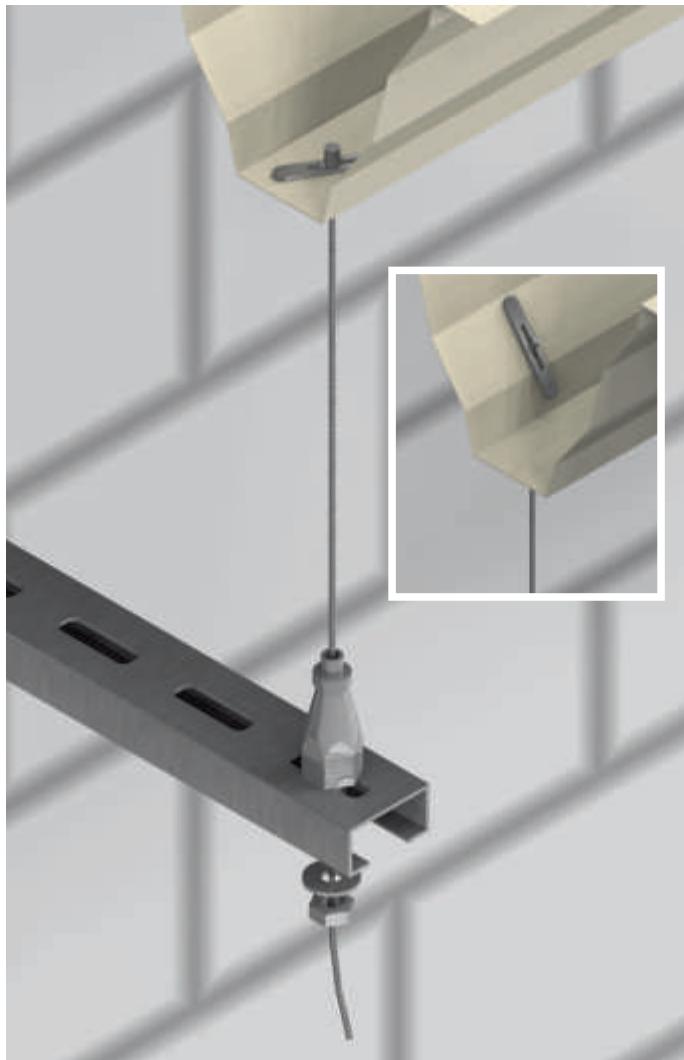

Specification

The full range consists of ready-made sections of steel wire from 1 to 10 meters with STL8x20 universal device with a safe working load (SWL):

25 kg 55 kg 85 kg 110 kg

Applications

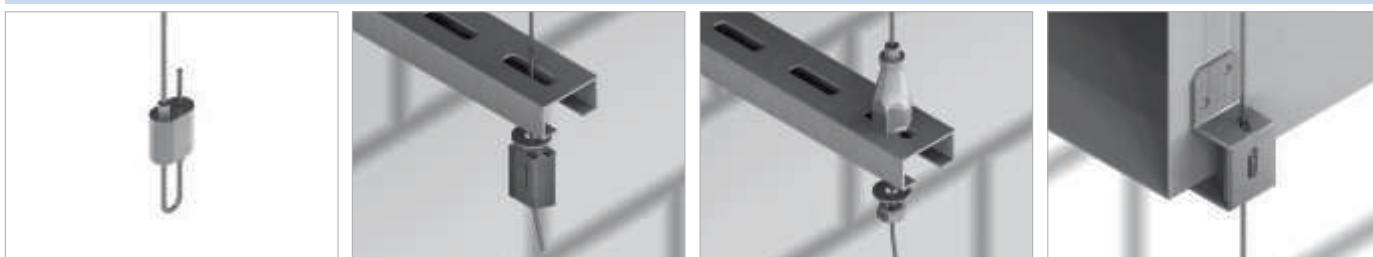

- Cable trays
- Ducts and ventilation pipes
- Channels and lighting tracks
- Lamps
- Junction boxes

Type	Length m	SWL kg	Pack pcs
TG15-1M-STL8x20	1	25	10

Other lengths also available upon request.

Available endings

Standard **4S** loop device.
Universal.

Stopper or loop type **KL**
device. Multifunctional.

STL 8x20 pass-through
device. M8 thread.

KV100 pass-through device.
Reversible.

Depending on the needs, we can choose various types of devices, differing in functionality and load capacity. What they have in common is quick assembly and smooth adjustment. All this makes the wires give us unlimited possibilities of attaching any suspension elements. If you do not know which one to choose, contact us, we will help you choose the optimal solution.
